TECHNICAL SKILLS

Python (pandas, NumPy)
MySQL, MongoDB, SQLite
Excel, MS Office, PowerPoint
Flask, REST APIs
HTML5, CSS3, JavaScript
Git/GitHub

CERTIFICATIONS

- HTML5 – The Language (Infosys Springboard)
- JavaScript (Infosys Springboard)
- CSS3 (Infosys Springboard)
- CISCO Networking Basics (CISCO)
- Python Training (Besant Technologies)
- NoSQL – MongoDB Developer (Infosys Springboard)

SOFT SKILLS

- Communication & Presentation
- Teamwork & Collaboration
- Problem-Solving
- Adaptability
- Time Management
- Leadership & Initiative

LANGUAGES

English, Hindi, Kannada, Telugu, Tamil

Fresher and logical problem solver with hands-on experience in database querying, schema design, and data visualization. Comfortable working across MySQL, MongoDB, SQLite, Python (pandas, NumPy), Excel, and MS Office (Word, PowerPoint). Seeking an entry-level Data Analyst role to apply strong analytical thinking and technical fundamentals to real-world data problems.

EDUCATION

Bachelor of Computer Applications (BCA) | 2023 – 2026

- Dayananda Sagar University, Bengaluru | CGPA: 6.72/10

Pre-University Course (PCMC), 12th Grade | 2021 – 2023

- Swami Vivekananda Pre-University College, Bengaluru | 66.33%

Karnataka State Board, 10th Grade | 2020 – 2021

- Swami Vivekananda Rural English Medium High School | 83.04%

EXPERIENCE

Python Programming Intern — Codsoft | Mar 2026 – Apr 2026, Remote

- Developed and completed multiple Python projects applying core programming concepts, including file handling and data structures for processing and organizing data.
- Debugged, tested, and optimized code to ensure accurate, reliable output.

PROJECTS

Memoryverse — Card Matching Memory Game | Solo Project, 2026

- Designed a 9-table relational database schema (SQLite) to structure leaderboard, achievements, and player statistics data, with indexing to optimize query performance.
- Built a REST API to query and update player data, including an XP scoring system and tournament tracking logic.
- Developed a full-stack application using Python (Flask), HTML5, CSS3, and JavaScript.

Project: github.com/mithunreddyr1406/memoryverse

AI Study Partner | Solo Project, 2025

- Built a Flask backend to handle real-time data flow between a web frontend and a third-party LLM API (Groq) for automated response generation.
- Structured request/response handling to support low-latency, personalized academic assistance.

Project: github.com/mithunreddyr1406/ai-study-partner

Personal Portfolio Website | Solo Project, 2026

- Responsive single-page site (vanilla HTML/CSS/JS), deployed on GitHub Pages.

Project: github.com/mithunreddyr1406/mithun-reddy-portfolio

Solar Tracking System using IoT | Group Project, 2024

- Integrated sensors, servo motors, and Arduino to automate real-time solar panel tracking based on sunlight intensity.
